

Did you know?

Did you know...

...improvements being made as part of the \$1.1 billion I-5 North Improvement Project are more than 75% done with only about one year left of freeway construction? *Completion is near!*

...once complete, the I-5 North Improvement Project will have added one HOV/carpool lane and one general-use lane to the I-5 in each direction between the 5/22/57 interchange and Beach Boulevard? *That will give motorists 38 miles of uninterrupted carpool lanes on the I-5 from PCH to Beach Boulevard!*

...all freeway on- and off-ramps along the project, including many roads running adjacent to the freeway also are being improved? *Note: The ramps and freeway overcrossing at Harbor Boulevard are already done, and so are the new freeway undercrossings at Katella Avenue, Orangewood Avenue and State College Boulevard!*

...the project provides a 24-hour, toll-free Transportation Helpline that you can call for answers to all your Orange County freeway construction questions? *We've attached a magnet to help you remember!*

Bonus: Do you know...how many calls the Transportation Helpline receives in an average month? *(The answer includes calls answered by the attendant during regular business hours and messages left with the automated attendant after hours.)*
The answer is: The Transportation Helpline averages 270 calls each month.

For answers to any of your own I-5 North Improvement Project questions – check out OCTA & Caltrans' web sites at www.octa.net or www.dot.ca.gov/dist12, or call the Transportation Helpline at 800/724-0353.

Improving the Road to the Future!
Thank You For Your Patience.
